**Medical Sciences**  
**Social Care**  
**Sports**  
**Sports Nutrition**  
**Web / Game Design**

**We are proud to offer over 25 subjects within our small Sixth Form Centre, each of which are delivered by subject specialists.**

**Our carefully planned curriculum allows our students to successfully move onto positive destinations, whether that be Higher Education, into an Apprenticeship, or directly into employment.**

**Students can select from a range of combination of qualifications, but we do offer a set of subject pathways, as outlined in this booklet, which have been designed to support progression into specific routes.**

**Please refer to our Course Guide or website for further details of each qualification listed within this booklet**

## **Business & Finance**

**BTEC L3 Business Studies**

**A Level Accounting**

**AAQ Level 3 IT - Data Analytics**

**L3 Mathematical Studies**

**The Business and Finance Pathway is, as the title suggests, ideal for anyone wishing to pursue a career or higher education within the business or finance field. Each subject complements the other, with the personal and business finance unit within Business Studies, working well alongside the A Level Accounting content; and the....**

**Upon completion of this pathway, students will hold the equivalent of 3.5 A level qualifications, each of which is recognised by employers and accepted by the vast majority of universities**

## **Creative Arts**

***Choose from three of the following:***

**A Level Art**

**RSL Level 3 Music Performance**

**BTEC Level 3 Creative Media**

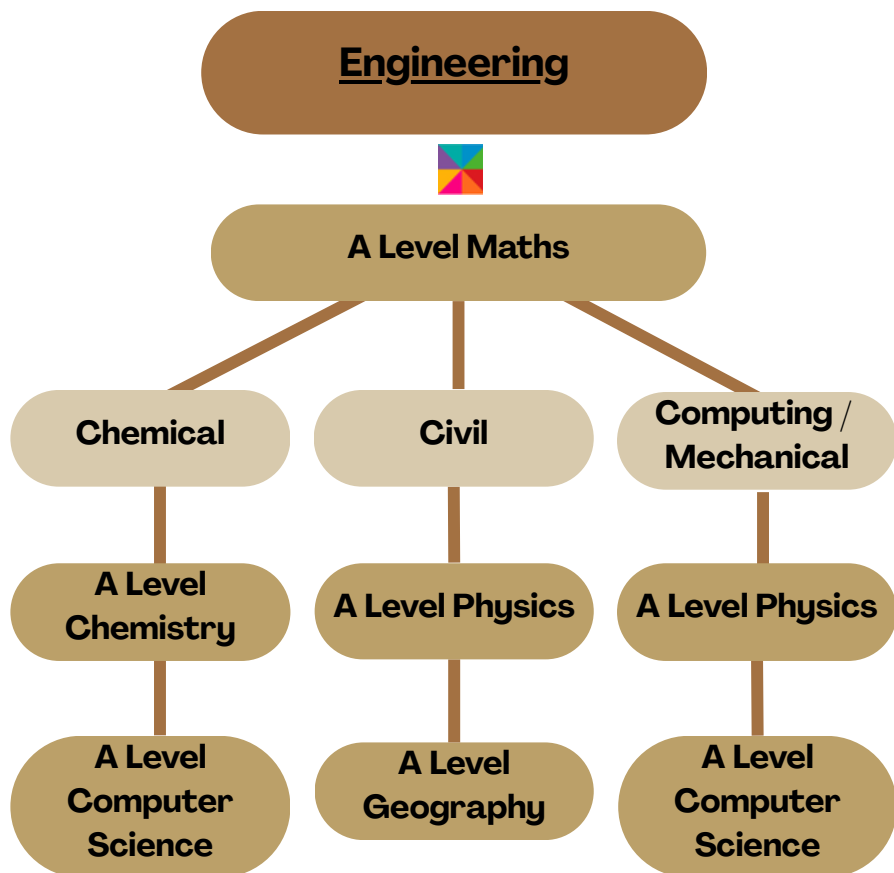

**A Level Photography**

**OCR Level 3 Performing Arts**

**Are you a performer or do you prefer unleashing your creativity behind the scenes? Students who take the Creative Arts Pathway can choose from a range of subjects to express their creative passion.**

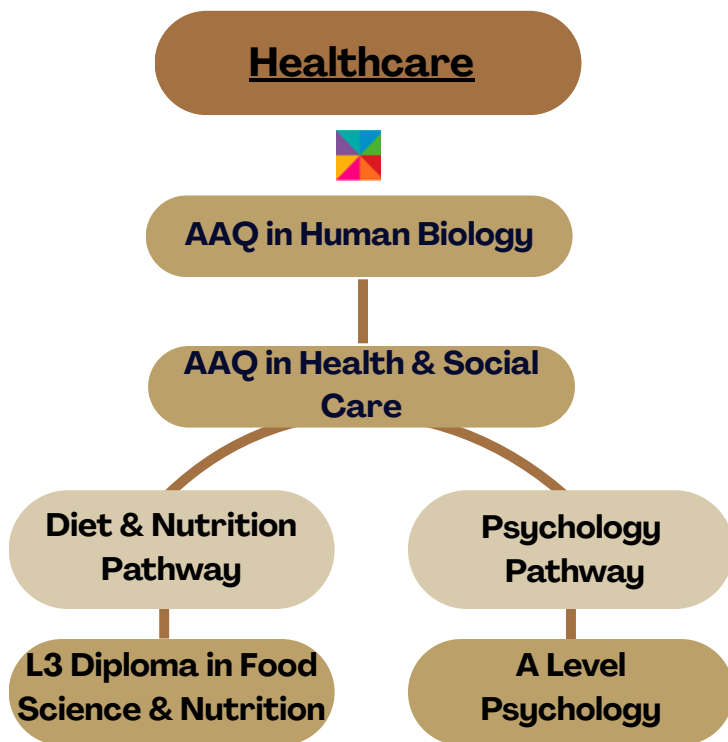

**Please note that Performing Arts may be replaced or complemented with A Level Drama, depending upon student interest.**

**It is also worth noting that both the Music Performance and Creative Media course are the equivalent of 1.5 A Levels each, therefore students may opt to study those two subjects only.**

**We offer a range of combinations to support progression within the field of engineering. Depending upon your preferences and strengths, you can select a pathway to take you into a career such as architecture, biochemistry, electronics, aerospace, renewable energy, engineering project management, and manufacturing to list a few.**

**This pathway will successfully take you into Higher Education or onto a related apprenticeship.**

**If you are considering a career in healthcare such as nursing, in dietetics or as a healthcare assistant then this pathway will be ideal for you. It explores not only the physiology of the human body, but also the skills and competencies needed when working in a caring profession.**

**The Psychology Pathway is perfect for students wishing to consider a career in mental health nursing, psychology or support work within that field**

## **Humanities**

***Choose from three of the following:***

**A Level English Language & Literature**

**A Level Geography**

**A Level History**

**A Level Sociology**

**If you enjoy exploring and understanding humanity, along with developing your analytical skills this could be the perfect pathway for you! On the Humanities Pathway, you will select three of the subjects listed above. Each of which will allow you to gain a different perspective into society and human beings, providing you with a deeper understanding of communities, the structure of society and where it all comes from.**

**This pathway forms perfect progression onto Higher Education.**

## **Medical Sciences**

**A Level Biology**

**A Level Chemistry**

**A Level Maths**

**The Medical Pathway is intended for students who wish to pursue a career in medicine, pharmaceutical, bio-medicine, dentistry, or veterinary science.**

**Either the Biology or Chemistry A Level can be substituted for A level Physics, which also offers a medical based module and would allow for successful progression to a medical and science related degree**

## Social Care

### AAQ in Health & Social Care

*Choose from Two Of:*

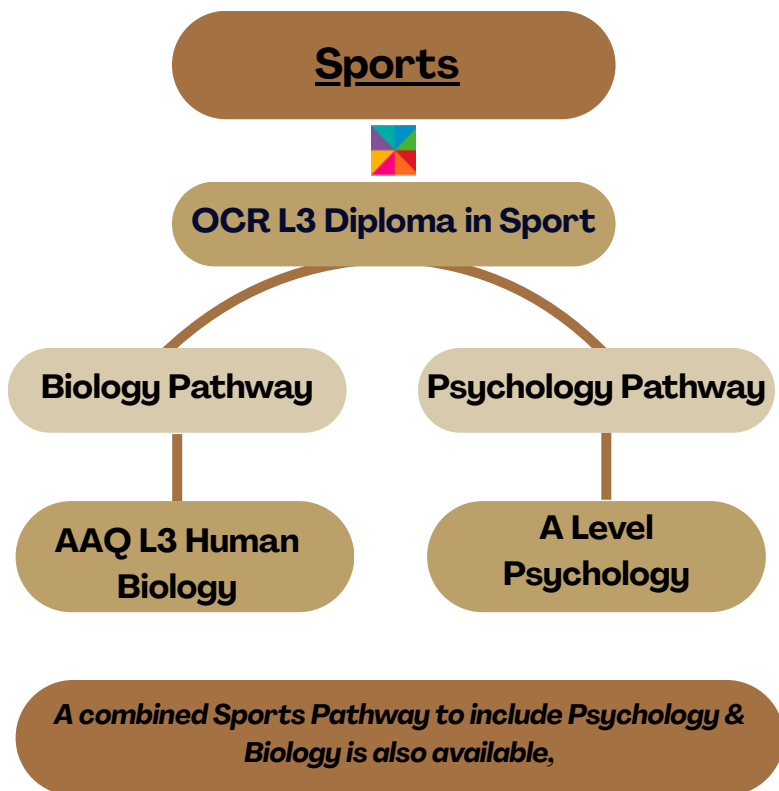

**A Level Sociology**

**A Level Psychology**

**L3 Diploma in Criminology**

**The AAQ in HSC provides the perfect basis for a career within the extensive social care sector, from providing care for the elderly, those with specific needs such as learning disabilities, children in care or mental health, to those involved within the Criminal Justice System.**

**Students can combine it with any two of Sociology, Psychology or Criminology, depending on their desired future social care pathway. This pathway ensures preparation for working requirements within the field., as well as for further study at a higher level.**

**The Sports Pathway is designed for students with a keen interest in Sport. The Diploma in Sport is the equivalent of two A Levels in size, so can be studied alongside just one other subject.**

**Although this pathway combines Sport with either Human Biology (perfect for those wishing to move into physiotherapy, coaching or fitness training) or Psychology (great for further study into the psychology of athletes), it can also be combined with other subjects such as Business Studies, which can be helpful for students considering self employment within the sporting industry.**

## **Sports Nutrition**

**Cam Tech L3 in Sports**

**L3 Diploma in Food  
Science**

**AAQ Level 3 Human  
Biology**

**If you are interested in a career in Sports and Nutrition, this pathway may be of interest to you. Your studies will be focused upon the human body, with specific consideration of the impact of sports, diet and lifestyle.**

**Students taking this pathway may progress onto further study in diet and nutrition in general or within the sports sector specifically. It can also lead into other careers within healthcare, or the wider sport and fitness sector**

## **Web / Game Design**

**BTEC L3 Creative Media**

**A Level Computer Science**

**AAQ Level 3 IT - Data  
Analytics**

**The Web/Game Design pathway is perfect if you are interested in gaming or web design. As part of this pathway you will look at the creative elements of application design and development.**

**You will focus on Computer Science looking at system architecture and algorithms, alongside the IT pathway with data analytics. This will also be combined with creative media which will support with the audience and design element of application development.**

**This pathway ensures that you are fully prepared for working in the application design or development industry.**
